

ABSTRACT OF THE DISCLOSURE

A liquid crystal display device includes a substrate, a gate electrode on the substrate, an insulating layer on the gate electrode, a semiconductor layer on the insulating layer, an ohmic contact layer on the semiconductor layer, source and drain electrodes on the 5 ohmic contact layer, a protective layer on the source and drain electrodes, the protective layer having a hole exposing a portion of one of the source and drain electrodes, a conductive electrode on the protective layer and electrically contacting the one of the source and drain electrodes, and a contact layer between the one of the source and drain electrodes and the conductive electrode.
